

Safeguarding Children Training Feedback

Made me realise there are so many ways that children can be harmed, and all the interventions that can make a difference.

Found the course interesting, learned things that went on in the local area that I was not aware of.

The course was very clear and informative, and makes it easy to keep up to date with current legislation.

It's a complete guide on how to raise concerns about children and why it's important to have a shared responsibility of keeping children safe.

It will give me the confidence to professionally challenge any circumstance in which CYP and their families may be needing support.

Clear information at the right level. Very current information about all aspects of safeguarding.
