

Our Vision

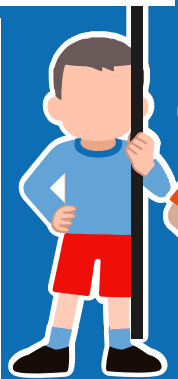

All partners are committed to working together so that every child in Staffordshire is safe, well and able to reach their full potential

Our Priorities - Neglect

We will make sure... that everyone who works with children in Staffordshire has the right tools and skills to become more confident in spotting the signs of neglect in the very young and getting the right early help needed to tackle that neglect.

We will make sure... our partners take responsibility for supporting staff through better systems and processes which will give everyone working with children more time to work with the most vulnerable families to get the right help as soon as possible.

We will make sure... our partners feel confident in understanding and responding to the lived experience and voice of the child through listening, watching and using the tools they have, including early help and Graded Care Profile 2, to act more quickly and better when spotting neglect.

Our Core Business

We will make sure... our partners use learning from reviews and feedback from children and families to develop local services that focus on the needs of those children and families at all times.

We will make sure... we listen to the voice of the child and understand their lived experience during all our work with children and families and that those voices will help everyone responsible for keeping children safe, work better across our all our partners.

We will work with our partners... to make sure they are keeping children safe from domestic abuse, child exploitation and the impact of Covid 19 by building better relationships with leaders and their teams to bring our plans together to make better outcomes for children.

We will make sure... our children, young people and families feel their voices are valued and we will give everyone an opportunity to be heard and to contribute.
